Subject: Phone Memorandum - Exp. AO on OFA

I spoke with Nando Meli on UDAQ by phone on April 16, 2003 at 4:18PM concerning a proposed experimental approval order to extend testing on overfire air.

He confirmed that this replaces the original experimental AO on OFA and that we have 180 days from the date of this AO issue date to continue to test OFA.

He also confirmed that the intent of the AO was to satisfy the need for any testing of the OFA as we requested in our letter of April 2, 2003, and discussed in his e-mail of April 3, 2003.
